Contents

Contents	1
1 Statistical Analysis of Agronomic Experiments	3
1 Data Analysis – A Cyclical Process	4
2 Types of Analyses	4
3 Data Types	6
4 Commonly used designs	6
5 Analysis methods	6
2 Linear models – Analysis of Variance	7
6 Completely Randomised Design (CRD)	7
6.1 Data Checking	14
6.2 Linear Model	14
6.3 Model Assumptions	15
6.4 Fitting the Model	16
6.5 Interpreting the Output	17
6.6 Prediction	19
6.7 Multiple Comparison Test	20
6.8 Data Checking	23
6.9 Linear Model	24
6.10 Fitting the Model	24
6.11 Interpreting the Output	25
6.12 Prediction	26
6.13 Multiple Comparison Test	27
7 Randomised Complete Block Design (RCBD)	32
7.1 Data Checking	34
7.2 Linear Model	34
7.3 Fitting the Model	36
7.4 Interpreting the Output	36
7.5 Prediction	38
7.6 Multiple Comparison Test	38
8 Latin Square	42
8.1 Data Checking	44
8.2 Linear Model	44
8.3 Fitting the Model	45
8.4 Interpreting the Output	46
8.5 Prediction	48
8.6 Multiple Comparison Test	48
3 Linear mixed models – Analysis of Variance	53
9 LMM – introduction	53
9.1 Linear Mixed Model	53
9.2 Fitting the Model	54
9.3 Interpreting the Output	54
9.4 Prediction	56
9.5 Multiple Comparison Test	56
9.6 Linear Mixed Model	59

9.7	Fitting the Model	59
9.8	Interpreting the Output	60
9.9	Prediction	61
9.10	Multiple Comparison Test	62
10	Variance Components	63
10.1	Likelihood ratio test	64
11	Split-plot	65
11.1	Data Checking	66
11.2	Linear Model	66
11.3	Fitting the Model	67
11.4	Interpreting the Output	68
11.5	Prediction – Genotype	71
11.6	Multiple Comparison Test – Genotype	71
11.7	Prediction – Fungicide	73
11.8	Multiple Comparison Test – Fungicide	73
11.9	Likelihood Ratio Test	75
4	Extending the model to include spatial modelling	77
11.10	Data Checking	77
11.11	Linear Model	77
11.12	Model Assumptions	77
11.13	Fitting the Model	77
11.14	Interpreting the Output	77
11.15	Prediction	77
11.16	Multiple Comparison Test	77
5	Extending the model to include more complex treatment structures	79
11.17	Data Checking	79
11.18	Linear Model	79
11.19	Model Assumptions	79
11.20	Fitting the Model	79
11.21	Interpreting the Output	79
11.22	Prediction	79
11.23	Multiple Comparison Test	79
6	Extending the model to include covariates – Analysis of Covariance	81
11.24	Data Checking	81
11.25	Linear Model	81
11.26	Model Assumptions	81
11.27	Fitting the Model	81
11.28	Interpreting the Output	81
11.29	Prediction	81
11.30	Multiple Comparison Test	81
7	Linear Models – Regression	83
8	Exercise Solutions	86
